 Huddleston, R. in G. K. Pullum 2005: *A Student's Introduction to English Grammar*. Cambridge: Cambridge UP
 Quirk, R. in S. Greenbaum 1993: *A University Grammar of English*. London: Longman
 Yule, G. 1996: *The Study of Language*. CUP

Cilji in kompetence:

Študent se seznani s temeljnimi pojmi iz angleškega jezikoslovja, s strukturiranostjo angleškega jezika, s posameznimi jezikovnimi ravninami in mehanizmi, ki te ravnine povezujejo. Študent spozna sinhrono in diahrono vidike v jeziku, pridobi torej splošni pregled razvoja angleškega jezika in vpogled v variante angleškega jezika. Seznani se tudi z vpetostjo angleškega jezika v družbo in kulturo. Tako študent pridobi osnovno znanje, ki je potrebno, da uspešno usvaja znanje pri posameznih jezikoslovnih predmetih v višjih letnih študija.

Objectives and competences:

The student familiarises with the basic concepts of English linguistics, the structure of language, with individual linguistic fields, and the mechanisms that control the interactions between these fields. S/he learns about the synchronic and diachronic aspects of language, thus acquiring a general overview into the development of English language and the varieties of it. The student also gains knowledge about the role of language in society and culture. With the course the student acquires sufficient knowledge for successful continuation in individual linguistic courses in the following years of study.

Predvideni študijski rezultati:

Znanje in razumevanje:

Predmet študenta angleščine seznani z osnovnimi razlikami med pojmom jezika in njegovo praktično rabo ter pojmom jezikoslovja, ki je veda o jeziku in zahteva poglobljen študij v elemente jezika in mehanizme, ki te elemente obvladujejo, spreminjajo, vodijo, razvijajo. Predmet študenta/ko pripravi na študij posameznih jezikoslovnih vsebin v višjih letnikih, ki tako postanejo učinkovitejša, saj ji/mu jezikoslovni sistemi več niso tuji in bo tako posamezne vsebine uspel umestiti v večji sistem, ki mu pravimo jezik. Asociacije in povezovanja med posameznimi ravninami ji/mu bodo v pomoč pri razumevanju posameznih delov jezika kot tudi jezika v celoti. Brez dobrega uvoda v študij angleškega jezikoslovja bo študent angleščine to izredno težko dosegel.

Intended learning outcomes:

Knowledge and understanding:

The course familiarises the English language student with the basic differences between concept of language and its practical use, and the concept of linguistics which is the field of study dealing with language, elements constituting it and the mechanisms controlling, changing, guiding and developing them. The course prepares the student for the study of individual topics in English linguistics introduced in later years of study. Students become aware of the connectedness between them and the language system as a whole. Associations and connections between individual fields of language help understand the whole system. Without a well-thought-out introduction to the study of English language this would be extremely difficult to achieve.

Objectives and competences:

The objective of this course is to get a systematic overview of various aspects of English grammar that they had already dealt with in a non-systematic fashion at secondary-school level, to be able to identify verbal forms in sentences in predicators and outside them and to learn to understand the role of the verb in grammar in general and its relationship toward other elements of grammar.

- poznavanje odvisnostnih odnosov med relativnimi in absolutnimi slovničnimi časi ter med osebnimi in neosebnimi glagolskimi oblikami. Ko študenti to osvojijo, postane njihova angleščina (in njene strukture) veliko bolj podobna tisti pri domačih govorcih

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will be able to

- distinguish between time and tense,

Cilji in kompetence:

Cilj predmeta je študentom ponuditi različna zanimiva, aktualna in relevantna poglavja iz angleškega jezikoslovja in tako nadgraditi njihovo predhodno znanje.

Cilj predmeta je tudi sistematično obdelati sodobne jezikoslovne teorije na ustreznih jezikovnih ravniinah (od fonološke naprej), vzbuditi pri študentih zanimanje za morda že kar nepriljubljena in navidezno neuporabna teoretska vprašanja tako, da pokažemo, da je mogoče zelo s pomočjo razumevanja teoretskih modelov reševati uporabna jezikoslovna vprašanja (npr. prek optimalnostne teorije razložiti procese, ki se dogajajo v otroškem govoru, v dialektih ipd.

Objectives and competences:

The aim of this course is to offer students various interesting, topical and relevant themes from English linguistics that will build upon the knowledge gained in previous courses.

The objective of this course is to systematically deal with contemporary linguistic theories at different levels of language (from the phonological level to discourse), encourage students to take interest in somewhat unappreciated and seemingly inapplicable theoretical issues in such a manner as to show that it is possible through the understanding of theoretical models to solve current linguistic problem (e.g. through optimality theory to explain processes occurring in children's speech, in dialects, etc..)

Predvideni študijski rezultati:

Znanje in razumevanje:

Razumevanje obravnavanih vsebin in konceptov.

Prenesljive/ključne spretnosti in drugi atributi:

Prenos teoretičnega znanja v prakso.

Po zaključku tega predmeta bo študent sposoben razumeti

- Kako so nastale sodobne jezikoslovne teorije?
- Katere sodobne jezikoslovne teorije obstajajo?
- Katere jezikoslovne teorije so bolj priznane, katere manj in zakaj?
- Katere jezikoslovne teorije uporabimo za razlago procesov v knjižnem jeziku (npr. vezalna) in katere za razlago procesov v otroškem jeziku, dialektu, . (npr. optimalnostna teorija)
- Kako jezikovne teorije praktično uporabiti za reševanje jezikoslovnih problemov

Intended learning outcomes:

Knowledge and understanding:

Understanding the contents and concepts discussed.

Transferable/Key Skills and other attributes:

Transferring theoretical knowledge into practice.

On completion of this course the student will be able to understand

- How present-day (contemporary) linguistic theories came to being.
- Which contemporary linguistic theories exist at present
- Which linguistic theories are accepted more and which less and why.
- Which linguistic theories are used more for solving problems in the standard language (e.g. Government theory) and which for dealing with issues relating to children's language, regional varieties of language, social varieties of

Vsebina:

- izgovorne in jezikovne značilnosti standardnih in regionalnih variant angleščine na Britanskem otočju:
 - škotska angleščina,
 - severno-irska angleščina,
 - valižanska angleščina,
 - severna angleška narečja,
 - narečja srednje Anglije.
- izgovorne in jezikovne značilnosti narečij na JV Anglije:
 - estuarijska angleščina (Estuary English)
 - Cockney.
- socio-regionalni govori (govori predstavnikov

Content (Syllabus outline):

- Pronunciation and language features of standard and regional dialects of English in the British Isles:
 - Scottish English,
 - North Irish English,
 - Welsh English,
 - Northern English,
 - Midlands English.
- Pronunciation and language features of the dialects of South East England:
 - Estuary English,
 - Cockney.
- Socio-regional dialects (the speech of speakers

- posameznih družbenih slojev na določenem območju).
- urbani govori v Angliji.

- of a certain social class from a certain region).
- Urban dialects in England.

Temeljni literatura in viri / Readings:

- Hughes, A. & Trudgill, P. 1996: *English Accents and Dialects, An Introduction to Social and Regional Varieties in the British Isles*, Hodder Arnold.
- Trudgill, P 1999: *The Dialects of England*, Blackwell Publishers.

- Foulkes, P. & Docherty, G. J. 1999: *Urban Voices: Variation and Change in British Accents*, Hodder Arnold.

Cilji in kompetence:

Cilj tega predmeta je, spoznati različne variante angleščine, ki jih govorijo na Britanskem otočju, zavedeti se, da narečja niso vezana le na geografski prostor, temveč tudi na sociološke vidike kot so izobrazba, družbeni sloj, spol in podobno, dobiti vpogled v britanske urbane govore, ki se naglo širijo in spreminjajo, in tako omogočiti boljše razumevanje domačih govorcev angleščine v njihovem domačem mestu.

Objectives and competences:

The objective of this course is to become familiar with the variety of English dialects spoken in the British Isles, to become aware that dialects relate not only to region but also to sociological factors such as education, social status, gender and the like, to get an insight into British urban dialects, which are rapidly spreading and changing, and thus to enable the students to better understand native speakers of English in their native town.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben:

- identificirati glavne sociološke in regionalne variante angleščine na Britanskem otočju,
 - analizirati izgovore in narečja v širšem okviru jezikovnih sprememb, vključno s fonetičnimi, fonološkimi in deloma slovničnimi in leksikalnimi razlikami na tem območju,
- uporabiti določene vidike deskriptivne dialektologije.

Prenosljive/ključne spretnosti in drugi atributi:

- Študenti na britanskem primeru uvidijo, da je pomembno ohraniti narečja, saj so ti v sebi zaključeni jezikovni sistemi, ki so funkcionalno popolnoma učinkoviti na območjih, kjer se govorijo. Zato naj ne bi bili podrejeni standardnim variantam, temveč enakovredni. To pa se dosega s t.i. dvonarečnim (bidialectal) pristopom, ki bi ga bilo mogoče prenesti tudi v slovenski prostor.

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will be able to:

- identify the main sociological and regional variants of English in the British Isles,
- analyse accents and dialects in the broader framework of language variation, including the phonetic, phonological and partial grammatical and lexical differences in this region,
- apply certain aspects of descriptive dialectology which will also be introduced

Transferable/Key skills and other attributes:

- On the British example students will learn that it is essential to maintain dialects, as they are perfectly efficient as language systems within their own speech communities and should thus not be subordinate to the standard variants, but treated as equals. This is best achieved by the so-called "bidialectal" approach, which could also be a model for Slovenia.

Metode poučevanja in učenja:

- predavanja (metoda razlage in pojasnjevanja z zaključno diskusijo)
- reševanje odprtih nalog in problemov
- domače naloge

Learning and teaching methods:

- lectures (method of explanation and clarification with final discussion)
- problem solving tasks
- homework assignments

Vsebina:

Predmet se osredotoča na vprašanje: zakaj se jezik spreminja? Študentom bodo predstavljene mehanizmi jezika in spremembe v dialektih na vseh jezikoslovnih stopnjah (fonološki, morfološki, skladenjski in leksikalni). Povdarek bo na teoretičnem vpogledu na sinhroničnih preiskavah o spremembah jezikov in dialektov. Čiste večne jezikoslovne spremembe so v soodnosu z dodatnimi jezikoslovnimi faktorji, ki vplivajo na jezikovne spremembe. Glavne

Pure internal linguistic changes are correlated with the extralinguistic factors that influence language
