2. Globalizacija in neenakomeren razvoj v svetu / Marjan Svetličič. - Ljubljana : Fakulteta za družbene vede, 2004

Cilji:

Cilj predmeta je, da slušateljem omogoči izgradnjo sistematičnega pristopa k razumevanju povezanosti ekonomije in politike v mednarodnih odnosih. Države in drugi akterji v mednarodnih odnosih zasledujejo svoje cilje, pri čemer se ekonomska in politična plat tesno prepleta. Mednarodna politična ekonomija se osredotoči na ta presek, s čemer omogoča razumevanje globalnih procesov. Ukvira se predvsem s sledečimi vprašanji:

- Kako vlade pod vplivom domačih interesov vodijo zunanjou ekonomsko politiko
- Kakšne so vloge političnih sil in mednarodnih institucij pri oblikovanju pogojev za pretok blaga in kapitala
- Kako globalizacija financ in proizvodnje spreminja opcije in obnašanje držav in multinacionalnih korporacij
- Kako gospodarska rast in tehnološki napredek v državi vpliva na njen mednarodni pomen
- Kje so izvori razvojnega prepada med Severom in Jugom

Objectives:

International economic events play an increasingly important role in international politics. The International Political Economy is focused to the interaction between economy and international relations. Governments and other actors in international relations pursue their political and economic goals in tight interconnection. The focal questions are:

- How governments influenced by domestic interests perform their international economic policy
- What is the role of political forces and international institutions in conditions for goods and capital flows
- How globalization of finances and production changes the options of governments and multinational institutions
- How the international importance of a country is influenced by her economic growth and technological progress
- What are the sources of the development gap between North and South

Predvideni študijski rezultati:

Znanje in razumevanje:

- Svetovnih gospodarskih dogajanj
- Globalizacije
- Razlik v razvoju

Predmet je namenjen spoznavanju študentov z napredno raziskovalno metodologijo s katero se soočajo družboslovci. Obravnavane bodo ključne metodološka in analitična vprašanja: zanesljivost mer, vprašanje izbire med kvalitativnimi in kvantitativnimi pristopi k raziskovanju, oblikovanje vprašalnikov, longitudinalne analize, identifikacija ustreznih statističnih metod, strategije za vzpostavljanje in vzdrževanje raziskovanja .	This course is designed to expose advanced students to diverse research methodologies commonly used by social scientists. Key methodological and analytical issues will be discussed in detail: assessing the reliability and validity of measures; quantitative and qualitative approaches; self-reports and questionnaire construction; analysis of longitudinal data; identifying appropriate statistical techniques for specific types of problems; and strategies for initiating and maintaining programmatic research.

In addition, students will be assigned weekly readings, mostly empirical articles and some chapters.

Cilji:

Razumevanje ključnih pojmov v okviru statističnih metod in družboslovnega raziskovanja, vključujuč aplikacijo različnih metod, merjenje, načrtovanje raziskovanja, osnovne in napredne raziskovalne metode.

Objectives:

Understand key issues related to methods in the social and behavioral sciences, that include assessment/measurement, study design, basic and advanced analytic approaches.

Predvideni študijski rezultati:

Znanje in razumevanje:

Študentje se bodo preko intenzivnega dela z bazami podatkov soočali s problem raziskovanja in aplikacije različnih statističnih metod.

Študentje bodo sposobni razviti in konceptualizirati raziskovalna vprašanja, aplicirati ustrezne raziskovalne metode, uporabiti prave mere in metode prileganja modelov zbranim podatkom.

Prenesljive/ključne spremnosti in drugi atributi:

1. Sposobnost znanstvene objektivnosti.
2. Metodološka in raziskovalna usposobljenost.
3. Interpretacija empirične evidence
4. Povezovanje teoretskih perspektiv in njihovo umeščanje v empirično evidenco.

Intended learning outcomes:

Knowledge and Understanding:

Students will complete 3 or 4 work intensive projects (with real data) that will teach them first hand issues outlined under course objectives.

Students will be able to develop and conceptualize research questions, apply appropriate measurement/assessment techniques, and use fitting data analytic approaches.

Transferable/Key Skills and other attributes:

1. Scientific objectivity
2. Methodological and research excellence.
3. Ability to adequately interpret empirical evidence.
4. Ability for application and cross linking various theoretical perspectives with empirical evidence.

Cilji:

Cilj predmeta je seznaniti študente z osnovnimi značilnostmi socialne strukture in temeljnimi socialnimi procesi v neevropskih družbah.
Poudarek bo dan dvojemu:

- deskriptivni predstavitev značilnosti in posebnosti neevropskih družbenih ustrojev;
- in primerjalni analizi (med različnimi neevropskimi družbami, med evropskimi in neevropskimi družbami) teh istih značilnosti na drugi strani.

Objectives:

The main goal of the subject is to introduce the basic characteristics of social structure and basic social processes in noneuropean societies.

Particular emphasis is on:

- descriptive presentation of characteristics and particularities in noneuropean societies
- comparative analysis (between different noneuropean societies, european and noneuropean societies) and their characteristics.

Vsebina:

Adolescenca je zavojno obdobje, za katerega so značilne bistvene fiziološke, psihološke, kognitivne in socialne spremembe v primerjavi z drugimi razvojnimi stopnjami tekom posameznikovega življenja. Je obdobje prehodov, individualne priprave na odraslost, obdobje družinskih sprememb, in obdobje tvorjenja in vzdrževanja novih medosebnih odnosov zunaj nuklearne družine. O tej stopnji posameznikovega razvoja kroži veliko število mitov, npr. Stanley Hallova konceptualizacija »Nevihte in stresa«. Cilj tega predmeta je preučiti normativni razvoj adolescenta kot ga občuti posameznik (biološke, kognitivne in družbene spremembe) znotraj različnih razvojnih kontekstov /družina, vrstniki, šola, delovno mesto,

Adolescence is a developmental period characterized by perhaps the most dramatic physiological, psychological, cognitive, and social changes when compared to other developmental stages across the lifespan. It is a period of transitions, a period of individual preparation for adulthood, a period of family change, and a period of formation and maintenance of new interpersonal relationships external to the "nuclear family." A great number of myths surround this stage of human development; for example, Stanley Hall's conceptualization of the period as one of "Storm and Stress." The aim of this course is to examine normative adolescent development as it occurs for the individual (biological, cognitive, and social changes) across different developmental

kultura, itd.). Prav tako bomo obravnavali številne nenormativne procese obnašanja in razvojne procese kot je npr. adolescentna psihopatologija in mladinska delikvenca z namenom bolj razumeti »normalen razvoj«. Zato bomo o adolescenci razpravljal v kontekstu različnih družboslovnih disciplin poleg družinskih študij in študij posameznikovega razvoja, tudi v kontekstu psihologije, sociologije in antropologije. Delo bo potekalo v obliki predavanj, diskusij, filmov in gostujučih govornikov.

contexts (family, peers, school, workplace, and culture). We will also examine a number of non-normative adolescent behaviors and developmental processes such as adolescent psychopathology and juvenile delinquency in order to better understand "normal development." Therefore, we will borrow from a number of other social science disciplines in addition to human development and family studies, including psychology, sociology, and anthropology. The course format will include lectures, discussions, films, and guest speakers.

Temeljni literatura in viri / Textbooks:

Santrock, J. W. (2007), *Adolescence* (11th Edition), Boston: McGraw Hill.

Cilji:

1. Študent bo razvil temeljno razumevanje zgodovine študij razvoja adolescenta, prav tako bo poznal temeljne teoretične okvire znotraj discipline.
2. Študent bo demonstriral temeljno poznavanje raziskovalne metodologije in statističnih postopkov, ki jih bo apliciral pri študijah posameznikovega razvoja.
3. Študent bo apliciral biološke, socioološke in psihološke koncepte na različne razvoje procese in rezultate razvoja adolescenta.
4. Študent bo prav tako razvil razumevanje sodobnih pogledov in spoznanj, v zvezi z razvojem adolescenta, problematičnega vedenja in življenjskih prehodov.
5. Študent bo prikazal sposobnost učinkovite uporabe knjižničnih baz z iskanjem empiričnih člankov.

Objectives:

1. The student will develop a basic understanding of the history of the study of adolescent development; furthermore, you will be expected to be familiar with major theoretical frameworks in the field.
2. The student will demonstrate a basic understanding of research methodology and statistical procedures as they might apply to the study of human development.
3. The student will be expected to apply biological, sociological, and psychological concepts to different developmental processes and outcomes of adolescent development.
4. The student will also develop an understanding of contemporary issues including but not limited to adolescent development, problem behaviors, and life transitions.
5. Finally, the student will demonstrate the ability to effectively utilize library resources by obtaining empirical articles.

Predvideni študijski rezultati:

Znanje in razumevanje:

Znanje in razumevanje razvoja adolescenta, razumevanje pomena raznolikih kontekstov (družina, vrtniki, šola, itd.)

Prenesljive/ključne spremnosti in drugi atributi:

Zmožnost samostojnega iskanja in uporabe virov, zbiranja informacij z uporabo sociooloških metod, uporaba IKT v predstavitevah, kritična analiza in sinteza, refleksija na prebrane vire, vključevanje v timsko delo, pisne in ustne komunikacijske spremnosti.

Intended learning outcomes:

Knowledge and Understanding:

Knowledge and understanding of adolescent development, with a consideration of multiple contexts (ie, family, peers, schools etc.).

Transferable/Key Skills and other attributes:

The ability to search for information in independent manner, collect information with the use of sociological methods, the use of ICT in presentations, critical analysis and synthesis, the reflection of processed literature and sources, teamwork cooperation, written and oral communication skills.

Metode poučevanja in učenja:

Predavanja, individualna pisno-raziskovalno delo, raziskovalni projekti

Cilji:

Seznanjanje s socioškimi vidiki razvoja političnih sistemov. Seznanjanje z razlikami znotraj formalno demokratičnih političnih sistemih. Seznanjanje in dojemanje vzrokov in posledic razlik med političnimi sistemami.

V tematizacijo vsebin je vključena historična in medkulturna perspektiva

Objectives:

Students acquaint themselves with social aspects of development of political systems and with differences within formal democratic political systems. Students become cognizant of causes and consequences of differences between political systems.

Content thematization includes historical and cross-cultural perspective.

Predvideni študijski rezultati:

Znanje in razumevanje:

Študenti poznajo temeljne vidike političnih sistemov v institucionalni, normativni in socioški optiki. Analizirajo temeljne politološke kategorije in jih reflektirajo v vodenih diskusijah in v pisnih oblikah: zbirajo in uporabljajo informacije, jih analitično obdelajo in povezujejo z družbeno prakso. Evalvirajo skladnost teoretičnih konceptov in življenjskih procesov.

Prenesljive/ključne spremnosti in drugi atributi:

Zmožnost samostojnega iskanja in uporabe virov, zbiranja informacij z uporabo socioških metod, uporaba IKT v predstavivah, kritična analiza in sinteza, refleksija na prebrane vire, vključevanje v timsko delo, pisne in ustne komunikacijske spremnosti.

Intended learning outcomes:

Knowledge and Understanding:

The students are familiar with fundamental aspects of political systems within institutional, normative and sociological optics. They analyse essential politological categories and reflect upon them in guided discussion and written forms; they collect and use information, have the ability to process them in analytical fashion and connect them with social reality. They evaluate the congruity of theoretical concepts and life processes.

Transferable/Key Skills and other attributes:

The ability to search for information in independent manner, collect information with the use of sociological methods, the use of ICT in presentations, critical analysis and synthesis, the reflection of processed literature and sources, teamwork cooperation, written and oral communication skills.

Vsebina:

Študent kritično oceni sodobne raziskave in koncepte v zvezi z mladino, razvojem adolescenta, s posebnim poudarkom na deviantnosti mladine oz. problematičnem vedenju (uporaba alkohola, drog, deviantnost in kriminaliteta). Predmet ni pregledni predmet kot tak, saj en sam semester ne omogoča primerne obdelave vseh pomembnih področij različnih ved, ki preučujejo adolescenta in njegov razvoj. Tako predmet ne bo pokrival vseh tem v zvezi z omenjeno problematiko, prav tako ne bo vsako poglavje v priročniku namenjeno obdelavi. Namen predmeta je seznaniti študente s ključnimi doganjaji na področju razvoja adolescenta, vedenja ter vedenjskih motenj. Predstavljeni bodo pogledi različnih disciplin, vključno s študijami

Content (Syllabus outline):

The purpose of this course is to critically examine recent research and conceptual work on adolescents, adolescent development, with a particular focus on adolescent problem behaviors (alcohol use, drug use, deviance and crime etc.) The course is not an overview course per se as a single semester would not allow adequate treatment of all relevant areas of scholarship that has bearing on adolescents and adolescent development. Thus, the course will not cover all topics relevant to the study of adolescence, nor will each chapter of the assigned Handbook be assigned for reading. The course is designed to familiarize you with key pieces of scholarship on adolescent development, behaviors, and problem behaviors drawing on different disciplines, including human development and family studies, psychology,

družine in človekovega razvoja, psihologijo, javnim zdravstvom, sociologijo in kriminologijo, izmed katerih je vsaka bistveno prispevala k preučevanju mladine v zadnjih desetletjih. Raziskave na tem področju so relativno novejše, kar potrjujejo tudi dejstvo, da je osrednja raziskovalna agencija za preučevanje razvoja adolescenta, »Society for Research on Adolescence (SRA)«, obstaja le dobrih 20 let.

Študij bo potekal v obliki »seminarskega dela«, saj se bo določen delež ur namenilo predstavljati študentov določenega področja, kar bo omogočalo aktivno participacijo v diskusiji. Zato je pomembna prisotnost v razredu, pomembna pa bo tudi študentova individualna priprava, delo in iniciativa.

Vsak teden bo eden izmed študentov/študentk vodil diskusijo na temo predpisanega teksta (glej spodaj). Poleg tega bo imel tudi predstavitev (PowerPoint in delovni listi) pred razredom, ki vključuje najmanj 3 novejša empirične raziskave, kot dodatek predpisanim tekstrom. Kljub temu da je glavni učni vir novejši (2003), pa raziskovalno polje ni statično, saj se konstantno objavlja rezultati študij. Študenti bodo tudi razvili kompetenco iskanja aktualnih virov preko knjižničnega in spletnega sistema.

public health, sociology, and criminology, all of which have greatly contributed to the distinct field of research on adolescents over the past few decades. Research in this area is comparatively recent as evidenced by the fact that the premier research society on adolescent development, the Society for Research on Adolescence (SRA), is only a little over 20 years old.

The format of this course will be distinctly "seminar," in that a portion of the classes will focus on presentations by students which in turn will be used to generate informed discussion. Thus, class participation is exceptionally important, and a large portion of the class will rely on student preparation, work, initiative, and follow-through.

Each week, one student(s) will be responsible for leading the discussion of assigned readings for the week (see tentative course timeline below). In addition, "leaders" will be required to make a presentation (using PowerPoint and handouts) to the class that covers the assigned readings and that must also include additional (at least 3), perhaps more recent, empirical work to complement the assigned readings. Though our primary text is recent (2003), the field is not static and additional scholarship continues to be generated on our weekly seminar topics. This requirement will also allow students to develop new or additional competency in completing library research on adolescence.

Temeljni literatura in viri / Textbooks:

G. Adams and M. Berzonsky (2003). Blackwell Handbook of Adolescence. Blackwell Publishing.

Additional weekly reading assignments (empirical articles complementing assigned chapters from text).

Cilji:

1. Študentom predstaviti novejše raziskovanje adolescence, ki jo obravnava kot edinstveno razvojno obdobje, s posebnim poudarkom na deviantnem vedenju adolescentov.
2. Razvijati in pospeševati prezentacijske sposobnosti kot tudi sposobnosti informirane diskusije.
3. Vcepiti navade in vrednote informirane diskusije in izmenjave, ki temelji na tako konceptualnih kot empiričnih raziskovanjih ki se osredotoča na adolescente in njihov razvoj

Objectives:

1. To provide graduate students in HDFS an in depth look at current scholarship which focuses on adolescence as a distinct developmental period, with a specific emphasis on adolescent problem behaviors.
2. To develop and facilitate presentational skills as well as informed discussion skills part of the seminar format.
3. To instill the habit and value of informed discussions and exchanges based on both conceptual work as well as empirical investigations that focus on adolescents and adolescent development .
