 - škotska angleščina,
 - severno-irska angleščina,
 - valižanska angleščina,
 - severna angleška narečja,
 - narečja srednje Anglije.
- izgovorne in jezikovne značilnosti narečij na JV Anglije:

 - Cockney.
- socio-regionalni govori (govori predstavnikov posameznih družbenih slojev na določenem območju).
- urbani govori v Angliji.

Content (Syllabus outline):

- Pronunciation and language features of standard and regional dialects of English in the British Isles:
 - Scottish English,
 - North Irish English,
 - Welsh English,
 - Northern English,
 - Midlands English.
- Pronunciation and language features of the dialects of South East England:
 - Estuary English,
 - Cockney.
- Socio-regional dialects (the speech of speakers of a certain social class from a certain region).
- Urban dialects in England.

Temeljni literatura in viri / Readings:

- Foulkes, P. & Docherty, G. J. 1999: *Urban Voices: Variation and Change in British Accents*, Hodder Arnold.

Cilji in kompetence:

Cilj tega predmeta je, spoznati različne variante angleščine, ki jih govorijo na Britanskem otočju, zavedeti se, da narečja niso vezana le na geografski prostor, temveč tudi na sociološke vidike kot so izobrazba, družbeni sloj, spol in podobno, dobiti vpogled v britanske urbane govore, ki se naglo širijo in spreminjajo, in tako omogočiti boljše razumevanje domačih govorcev angleščine v njihovem domačem mestu.

Objectives and competences:

The objective of this course is to become familiar with the variety of English dialects spoken in the British Isles, to become aware that dialects relate not only to region but also to sociological factors such as education, social status, gender and the like, to get an insight into British urban dialects, which are rapidly spreading and changing, and thus to enable the students to better understand native speakers of English in their native town.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent sposoben:

- identificirati glavne sociološke in regionalne variante angleščine na Britanskem otočju,
- analizirati izgovore in narečja v širšem okviru jezikovnih sprememb, vključno s fonetičnimi, fonološkimi in deloma slovničnimi in leksikalnimi razlikami na tem območju,
- uporabiti določene vidike deskriptivne dialektologije.

Prenosljive/ključne spretnosti in drugi atributi:

Študenti na britanskem primeru uvidijo, da je pomembno ohranjati narečja, saj so ti v sebi zaključeni jezikovni sistemi, ki so funkcionalno popolnoma učinkoviti na območjih, kjer se govorijo. Zato naj ne bi bili podrejeni standardnim variantam, temveč enakovredni. To pa se dosega s t.i. dvonarečnim (bidialectal) pristopom, ki bi ga bilo mogoče prenesti tudi v slovenski prostor.

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will be able to:

- identify the main sociological and regional variants of English in the British Isles,
- analyse accents and dialects in the broader framework of language variation, including the phonetic, phonological and partial grammatical and lexical differences in this region,
- apply certain aspects of descriptive dialectology will also be introduced

Transferable/Key skills and other attributes:

On the British example students will learn that it is essential to maintain dialects, as they are perfectly efficient as language systems within their own speech communities and should thus not be subordinate to the standard variants, but treated as equals. This is best achieved by the so-called "bidialectal" approach, which could also be a model for Slovenia.

Cilji in kompetence:

Cilj predmeta je utrditi zavedanje študenta, da so vizualne podobe v književnosti lahko enakovredni sestavni del književnega dela in da jih je večinoma mogoče analizirati z istimi oz. prilagojenimi literarnoteoretskimi pristopi kot besedilo. Predmet želi študente opozoriti na literarne žanre, katerih vizualna podoba je neločljivo povezana z besedilom (npr. vizualna poezija), v katerih podoba prevladuje (npr. grafični roman) ter tiste, ki tradicionalno niso spadali na področje književnosti (npr. fotografija, film in videoigra).

Objectives and competences:

The objective of this course is to foster in the student an awareness that visual images in literature can be an equal part of a literary work and that they can mostly be analyzed with the same or adapted literary-theoretical approaches. The course aims to draw students' attention to literary genres where visual images are inextricably linked to the text (eg., visual poetry), to those in which image has a dominant role (eg., graphic novels) and to those that have traditionally not belonged to the field of literature (eg., photography, film and video games).

Predvideni študijski rezultati:

Študent bo po opravljenem predmetu sposoben analizirati in vrednotiti književna besedila, ki so tako ali drugače povezana z vizualnimi podobami oz. jih vsebujejo. Pri analizi vizualnih sredstev bo sposoben uporabiti tako ustrezen nabor jezikovnih in slogovnih pristopov kot tudi primerno strokovno terminologijo.

Intended learning outcomes:

Upon completing the course, the student will be able to analyze and evaluate literary works that contain visual images, or are in one way or another related to them. In the analysis of visual aids, the student will be able to apply a relevant set of linguistic and stylistic approaches as well as use the appropriate terminology.
